

[The Global Campaign for Climate Action](#) runs the **TckTckTck** campaign which **strengthen s global civil society action**

to prevent catastrophic climate change, adapt to climate impacts and make the transition to a more sustainable and just world.

The world's climate is changing. Every year, hundreds of thousands of people in developing countries die because of climate change-related crises. Environmental disasters cost governments billions. In particular, **climate change is having a devastating effect on children, who are least responsible and most vulnerable to the impact of climate change**.

'**Tck Tck Tck**' symbolizes that time is ticking down and urgent action is needed for millions of people already suffering from climate change, and for those communities who will suffer most in the future.

There is a space for everyone to get involved. Wait no longer!
