

**World Environment Day (WED) 2010 is aimed to be the biggest, most widely celebrated, global day for positive, environmental action.**

Commemorated on 5 June since 1972, WED is one of the principal vehicles through which the UN stimulates worldwide awareness of the environment and encourages political attention and action.

Through WED, we are able to give a human face to environmental issues and enable people to realize not only their responsibility, but also their power to become agents for change in support of sustainable and equitable development.

WED is also a **day for advocating** partnerships among all stakeholders or perhaps, even more correctly, among all species living on this one planet and sharing a common future.

The theme of WED 2010 is “**Many Species. One Planet. One Future.**” It echoes the urgent call to conserve the diversity of life on our planet.
